

Introduction

I'm Raj Aryan, currently pursuing a degree in Computer Science and Engineering at KIIT University, Bhubaneswar. My academic focus includes software development, database management, and machine learning and enjoy problem-solving and developing creative solutions. In terms of family, I come from a supportive background with my father, who has always encouraged me to follow my passions.

Apart from academics, I have a keen interest in cricket, which I enjoy as a hobby. I am always eager to learn and expand my knowledge, and I enjoy discussing topics related to geopolitics, global affairs & technology trends.

What motivates you to Work with TCS?

I'm motivated to work with TCS because it's known as a global leader in technology and consulting. The company's focus on innovation, career growth, and making a positive impact on society aligns with my goals. TCS offers exciting opportunities to work with advanced technologies like AI, machine learning, and cloud computing, which I'm eager to explore. I also admire TCS's values of sustainability and community development. I'm excited about the chance to contribute to meaningful projects while learning and growing in such a respected company.

Why Should We Hire You?

I believe I'm the ideal candidate for this position because I bring a strong blend of technical skills, problem-solving abilities, and a genuine passion for technology. My background in software development, coupled with my knowledge of programming languages like Python, C++, and JavaScript, allows me to contribute effectively from day one. I am always eager to learn and grow, which makes me adaptable to new challenges and environments. Additionally, my drive to make a meaningful impact, combined with my teamwork skills and dedication, ensures I'll contribute positively to your company's goals.

Strength and weakness

I'm naturally inclined to help others and take on responsibilities, which is a strength, but it can also lead to me overcommitting at times. While I enjoy being supportive, I'm learning to set clearer boundaries and prioritize tasks better. This helps me manage my time more effectively and ensure I can focus on delivering quality work without feeling overwhelmed.

Are you comfortable relocating?

Yes, I am comfortable relocating if the opportunity requires it. I am open to moving to a new location for the right role and to furthering my career development.

In five years, where do you see yourself?

In five years, I see myself in a position where I've significantly grown both technically and professionally. I hope to become more skilled in areas like software development, AI and cloud computing, and I'd love to take on more leadership responsibilities, whether as a team lead or in a

managerial role. Ultimately, I'd like to be in a position where I'm continuously learning and making a meaningful impact within the company, while also helping others grow and succeed.

What do you anticipate from the company?

I anticipate a supportive and dynamic environment where I can continue to learn and grow professionally. I look forward to being part of a team that values innovation and collaboration, where I can contribute my skills while also gaining new experiences and challenges. I hope to develop my abilities further and take on new responsibilities, with opportunities to work on exciting projects that have a real-world impact.
